Dear Commissioner,

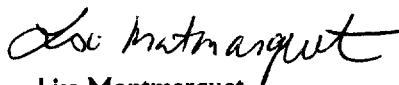

I am writing to you regarding the unnecessary use of antibiotics in animal feed.

The constant use of these drugs to fatten the animals can actually make bacteria resistant to those antibiotics. And this could eventually result in physicians having no way to treat life-threatening bacterial infections in humans. In essence, the use of these drugs may threaten human lives.

That is why I support the petition filed by CSPI.

Thank you for your attention to this matter.

Sincerely,

Lisa Montmarquet
